Job description / Tasks to be developed:

The Molecular Genetics of Pediatric Lymphomas group led by Itziar Salaverria is a newly established research team focused on the genetic study of pediatric lymphoid neoplasms. The group is interested in understanding the genetic, epigenetic, and molecular mechanisms underlying the biological diversity of these tumors and how they may influence the different clinical evolution of the patients. The group has contributed significantly to the knowledge of these tumors and it is a reference national center for the study of these pediatric diseases.

The selected candidate will work in research project focused on analyzing the importance of genetics and epigenetics for the characterization of pediatric hematological malignancies "*Linfomas en nens i adults joves: Impacte de les alteracions genètiques i moleculars en la classificació i estratificació de les pacients*".
