Job description / Tasks to be developed:

A postdoctoral position is available in the Liver Cancer Translational Research Lab at IDIBAPS.

The lab is led by Prof. Llovet and it consists of a multidisciplinary team dedicated to unravel the molecular determinants of liver cancer, identify novel treatments for study candidates and predictors of response. Our research pivots on high-throughput genomic data and state-of-the-art disease models. Current areas of interests include the identification of mechanisms driving immune infiltration, and of biomarkers of response to treatments (including immune checkpoint inhibitors and combinations); and the development of mouse models capable of recapitulating specific features for testing the efficacy of different therapies and to assess mechanism of drug action. Our efforts are supported by several national and international grants.

IDIBAPS is a centre for research of excellence that combine clinical research of proven quality with highlevel basic research. It can thereby achieve a more effective transfer of scientific advances in the prevention and treatment of the most common health problems. IDIBAPS aims to ensure that medical challenges are smoothly translated into basic research, and that the results obtained in laboratories can be effectively used to benefits study candidates. Improving people's health is its ultimate mission.
