The aim of the Core Facilities is to provide a centralised access to scientific outstanding expertise, experimental design, costly equipment, technical and methodological support and training of users, to internal and external researchers. The Core Facilities are willing to participate in the progression of research by providing advice in experimental planning and / or interpretation of results. Depending on the degree of participation, we can agree on an eventual authorship from Core Facilities personnel, in addition to the acceptance of the budget.

Similarly, we remind you about the need to acknowledge the activities of the Core Facilities in the Acknowledgements section of scientific publications derived from the work. Please check information on how to cite each Core Facility in the guidelines from IDIBAPS
